DRATA

CONTINUOUS COMPLIANCE

Audit Hub

Centralize auditor collaboration, evidence requests, and approvals in one secure workspace. Audit Hub reduces back-and-forth with your auditors and keeps audits on track.

DISCOVER THE DRATA DIFFERENCE

▶ Save Time on Audits

Tired of wasting your time constantly switching between disparate tools and communications platforms? Audit Hub helps you run smoother audits by consolidating messages, tasks, and evidence into a secure portal—so nothing gets lost and timelines stay clear.

▶ Streamline at Scale

Communicate with your auditor in-platform, track approvals, and understand expectations so you can close audits faster. Auditors can pick sample data, request documents, and tag you in action items so you have a clear view of what evidence is needed and what next steps are necessary.

▶ Keep Audits Streamlined

All relevant audit information lives in a secure portal with an auditor view accessible only to authorized parties. Drata automatically pulls in the evidence for your audit period to the hub—eliminating endless emails, Slacks, and notifications requesting evidence. Within the portal itself, auditors can view past audits for added context and better understanding of the current one.

▶ Tap Into the Drata Auditor Alliance Program

Find an auditor that works best for your specific needs and chosen frameworks. Drata works with a curated network of enterprise-grade audit firms in the Auditor Alliance to deliver consistent, defensible audit outcomes.

Unify Communication and Collaboration with Your Auditors

HOW AUDIT HUB WORKS

Add Your Auditors
Create a new audit, enter framework and audit period details, and add desired auditors.

Download Packages
Review the pre-audit package and control evidence package automatically generated as a point-in-time snapshot.

View Auditor Requests
See details about the request, related controls, and any additional context in messages.

Communicate Effectively
Upload additional evidence, update the status, or respond to questions from the auditor in-thread.

Freeze and Finalize
Align expectations with your auditor and agree upon when you'll freeze samples and finalize packages.

Run Internal Audits
Use the same process within Audit Hub to review evidence and help prevent external audit findings.
