DRATA

Trust Management, Powered by Agentic AI

Give security, GRC, and sales teams faster answers, reviews, and remediation, without sacrificing governance or control. Drata AI embeds intelligence across compliance, risk, and assurance workflows to automate repetitive work, reduce errors, and move teams from reactive compliance to continuous trust.

DRIVE BETTER OUTCOMES WITH AGENTIC TRUST MANAGEMENT

Agentic TPRM Assessment

AI autonomously retrieves vendor documents, evaluates them using centralized criteria, and highlights areas that require attention. The agent then generates targeted follow-up questions based on criteria gaps and communicates directly with the vendor. Upon completion, it produces assessment outputs that link criteria, evidence, and conclusions in one place.

AI Questionnaire Assistance

AI answers security questionnaires using external Trust Center content and internal Knowledge Base documentation to reduce manual work and accelerate sales cycles. Utilizing approved security and compliance information, AI quickly generates accurate responses when new questionnaires are submitted while continuously learning based on human approvals and edits.

AI Policy-to-Control Mapping

As new policies are approved or published, AI suggests accurate control mappings directly from the policy text, cutting setup time and improving overall framework alignment. AI analyzes the content and surfaces the controls most likely to apply, then provides recommended mapping to help ensure completeness, traceability, and strong audit readiness.

FEATURED AI CAPABILITIES

▶ AI Vendor SOC 2 Summaries

AI extracts key insights from SOC 2 reports to streamline third-party assessments and save teams time.

▶ AI Vendor Summaries

AI highlights critical compliance details from vendor questionnaires to third-party risk assessments.

▶ AI Test Failure Insights

AI explains test failures to help teams understand issues and remediate compliance gaps quickly.

▶ AI Trust Library Search

AI searches the Trust Library to help GRC teams find content instantly, answer questions faster, and accelerate customer reviews.

▶ AI Chrome Extension

AI assists directly in customer trust portals, filling out questionnaire answers without switching tabs or losing context.

▶ AI-Generated Cloud Tests

AI builds automated tests for AWS, Microsoft Azure, and GCP to expand coverage and boost control assurance.

▶ AI Document Parsing

AI extracts questions from PDFs and DOCX files to accelerate questionnaire completion and reduce manual effort.

▶ AI Trust Item Descriptions

AI generates high-quality, externally-facing Trust Item descriptions in seconds for faster onboarding and more consistency.

▶ AI Suggestions for Policy Center

AI provides control suggestions for custom and modified policies to extend audit readiness and reduce manual oversight.

▶ AI Search in Collaboration Tools

AI meets users where they work most often by providing answers to trust questions asked via Slack and Microsoft Teams.

▶ AI Knowledge Base Control

AI automatically identifies invalid entries, questions, answers and conflicting answers in your Knowledge Base.

▶ More AI Coming Soon!

Stay tuned for additional products and new feature enhancements coming to the Drata Agentic Trust Management Platform.

TRUSTED BY 8,000+ GLOBAL CUSTOMERS

asana · Brex · ClickUp · GitLab · instacart · okta · OpenAI · tenable · Vercel · WIZ

> THE TOP BENEFIT OF WORKING WITH DRATA IS THE AUTOMATION. THE PLATFORM HAS VERY ROBUST AI FEATURES AND INNOVATIVE CAPABILITIES THAT ARE ESPECIALLY ATTRACTIVE.
