DRATA

FedRAMP Compliance Automation

Operate in federal markets with FedRAMP. Drata helps centralize evidence, manage controls, and support ongoing authorization efforts so teams can stay audit-ready and build trust with government buyers.

DISCOVER THE DRATA DIFFERENCE

▶ Operate FedRAMP in a Multi-Framework Program

Drata reuses NIST 800-53–based controls across frameworks, allowing FedRAMP to operate alongside other enterprise programs. With multi-framework support and customization for specific needs, teams scale authorization efforts without duplicating controls, evidence, or ownership structures.

▶ Keep Continuous Visibility into Authorization Risk

Drata keeps vulnerability and risk data connected to controls, supporting continuous monitoring. Teams maintain visibility into remediation and exposure for ongoing ConMon and annual assessment requirements.

▶ Explain Control Deficiencies Before 3PAO Reviews

Drata AI explains control test issues aligned to FedRAMP requirements, including when controls behave unexpectedly during continuous monitoring. Teams understand what's happening, why it matters, and what to fix so they can stay ahead of 3PAO assessments.

▶ Assess Vendor Risk Under FedRAMP Scrutiny

Drata assesses third-party security evidence consistently, supporting inherited controls and supply-chain risk decisions. Teams manage vendor risk at scale without sacrificing rigor under FedRAMP scrutiny.

ADDITIONAL CAPABILITIES

Centralize Authorization Evidence
Unify FedRAMP evidence references to support continuous assessments and annual reviews.

Track POA&M Remediation
Oversee FedRAMP POA&M remediation with ownership, status, and linked evidence in the platform..

Monitor Authorization Controls
Continuously observe FedRAMP controls to detect failures impacting authorization status.

Coordinate Reviews
Align FedRAMP assessment reviews with structured access, artifacts, and reporting workflows.

Orchestrate Compliance Workflows
Route FedRAMP control tasks, reviews, and remediation through configurable workflows.

Evaluate Cloud Providers
Assess cloud service and third-party security against FedRAMP requirements using TPRM workflows.
