DRATA

ISO 27018 Compliance Automation

ISO 27018 establishes privacy-focused controls for protecting personally identifiable information in public cloud environments. Drata helps centralize evidence, map controls, and streamline monitoring so teams stay prepared.

DISCOVER THE DRATA DIFFERENCE

▶ Centralize Cloud Privacy Evidence for Reviews

Drata links privacy-related risks to the ISO 27018 controls they affect, providing a clear view of where personal data risk exists in cloud environments. As processing activities, vendors, or regions change, you can explain current risk exposure and control coverage during customer reviews and internal governance discussions.

▶ Clarify PII Control Gaps with AI Insights

Drata AI explains control test issues related to ISO 27018 privacy requirements, including when controls behave unexpectedly. Teams understand what is occurring, why it matters for protecting personal data in cloud services, and what to review next when preparing for audits, customer privacy questions, or regulator-driven assessments.

▶ Maintain Continuous Compliance Readiness

Drata supports ISO 27018 requirements with continuously-monitored controls and always-current evidence tied to cloud privacy obligations. Teams maintain visibility into control status as environments evolve, reducing reliance on point-in-time assessments and minimizing disruption during audits or customer privacy inquiries.

▶ Prepare for Ongoing Customer Privacy Reviews

Drata centralizes evidence, test results, and control context related to ISO 27018 in a single workspace with Audit Hub. Teams reduce back-and-forth with auditors by presenting consistent, well-organized privacy evidence, making reviews more predictable and less disruptive across cloud providers and regions.

ADDITIONAL CAPABILITIES

Protect Cloud Privacy
Define ISO 27018 privacy controls for cloud services using a structured, reusable control library.

Centralize Evidence
Unify ISO 27018 evidence to support audits, surveillance reviews, and ongoing oversight.

Align Privacy Policies
Map ISO 27018 privacy policies to controls with tracked reviews, approvals, and version history.

Answer Questionnaires
Respond to ISO 27018 privacy questionnaires using AI-assisted, human-reviewed responses.

Assess Cloud Processors
Verify cloud service providers against ISO 27018 privacy requirements using TPRM workflows.

Share Privacy Assurance
Publish ISO 27018 privacy documentation securely through Trust Center for customer transparency.
