DRATA

Microsoft SSPA Compliance Automation

Microsoft Supplier Security and Privacy Assurance is a mandatory program for suppliers that process personal or confidential data or use AI systems. Drata helps teams unify evidence and monitor controls to demonstrate trust.

DISCOVER THE DRATA DIFFERENCE

▶ Clarify Supplier Risk for Microsoft Data Handling

Drata links Microsoft SSPA requirements to the risks associated with handling Microsoft Personal or Confidential Data. As services, data flows, or subcontractors change, teams maintain an up-to-date view of supplier risk exposure, supporting clearer ownership and more defensible conversations during Microsoft reviews and internal escalations.

▶ Use AI to Explain SSPA Control Behavior

Drata AI explains control test issues mapped to Microsoft SSPA requirements, including unexpected control behavior. Teams see what happened, why it impacts Microsoft data protection expectations, and what to review next for supplier attestations, customer escalations, or third-party validation requests.

▶ Maintain Continuous Readiness for SSPA Reviews

Drata supports Microsoft SSPA with continuously-monitored controls and always-current evidence aligned to DPR obligations. Teams maintain visibility into readiness throughout the year, helping them stay prepared for annual attestations, Microsoft reviews, and potential third-party validation without last-minute evidence collection.

▶ Extend Supplier Oversight Globally

Drata manages Microsoft SSPA across regions, data locations, and subcontractors within a single control-centric program. Teams maintain consistent oversight for suppliers supporting Microsoft engagements while adapting to local privacy and security requirements without fragmenting governance or ownership.

ADDITIONAL CAPABILITIES

Map Supplier Controls
Align Microsoft SSPA controls to internal systems with clear ownership across supplier responsibilities.

Centralize Evidence
Unify Microsoft SSPA evidence to support reviews, attestations, and ongoing oversight.

Assess Supplier Risk
Review supplier security posture against Microsoft SSPA requirements using scalable TPRM workflows.

Automate Workflows
Route Microsoft SSPA control tasks, reviews, and remediation through custom workflows.

Share Assurance Materials
Publish approved Microsoft SSPA documentation securely through Trust Center.

Answer Security Questionnaires
Respond to Microsoft SSPA security questionnaires using AI-assisted, human-reviewed responses.

TRUSTED BY 8,000+ GLOBAL CUSTOMERS
