

ENTERPRISE

Transform Enterprise Trust Management with Unified GRC + Assurance

DISCOVER THE DRATA DIFFERENCE

Simplify Multi-Framework Compliance

Centralize framework requirements in one system to support multiple frameworks and complex audits at once.

With Drata, shared controls, automated tests, and continuously collected evidence enable consistent compliance management. You maintain flexibility for framework-specific requirements while standardizing how compliance is run across the organization.

Provide Trust Assurance on Demand

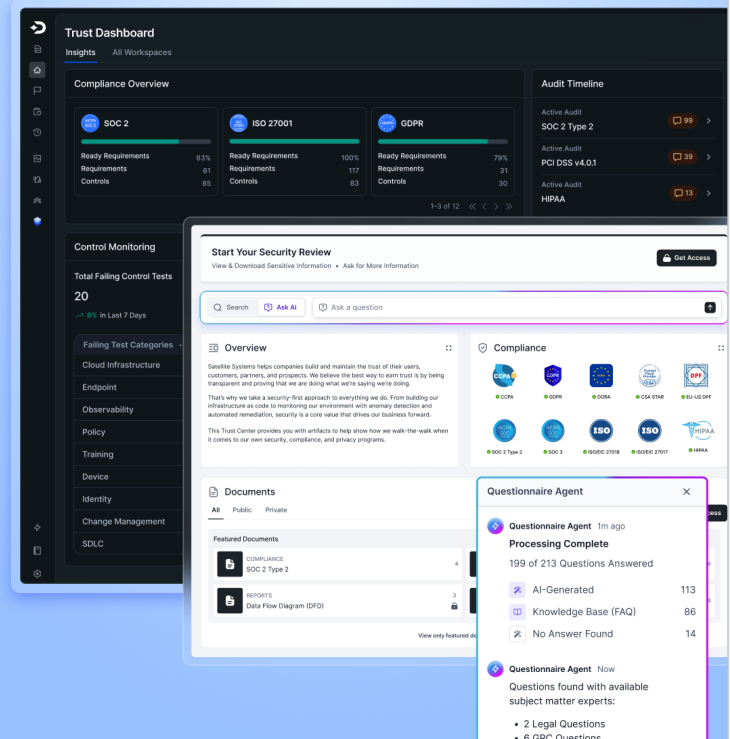

Give your customers, prospects, and other stakeholders an always-on destination to access security content and answer common questions.

With Drata, you control access to your branded Trust Center to surface the right information fast and let prospects self-serve trust reviews.

Accelerate Sales Cycles

Use live data from your Trust Center and compliance program to generate accurate responses to inbound security questionnaires in minutes.

Drata enables you to answer customer questions in minutes so you can move enterprise deals forward without losing control.

Configure & Customize to Your Needs

Every business is unique, so your trust management platform should be too. Drata provides customizable frameworks, controls, and tests tailored to meet your specific business needs and industry requirements.

You get the best of both worlds: complete configurability and complete automation. With Drata, you have flexibility in your GRC and assurance workflows as your business needs grow and change.

TRUSTED BY 8,000+ GLOBAL CUSTOMERS

PRODUCTS AND FEATURES FOR ENTERPRISE TEAMS

Enterprise GRC

Centralize governance, controls, risks, policies, and evidence across the enterprise to stay continuously audit-ready.

Trust Center

Give customers a secure, self-serve portal to review your security posture, request access to documents, and receive answers.

AI Questionnaire Assistance

Use AI to draft accurate, consistent responses based on your approved trust content to reduce repetitive work.

Third-Party Risk Management

Simplify vendor onboarding with standardized assessments, automated follow-ups, and one place to track risk.

Drata AI

Take advantage of native AI features and agents to transform GRC from a defensive necessity into a business enabler.

▶ User Access Reviews

Centralize access data from critical systems so reviewers can validate user access and document judgments for audit evidence.

▶ Custom Workflows

Design event-driven workflows without code to trigger actions across tests, risks, evidence, and personnel.

▶ Controls and Evidence

Define controls once, manage control ownership clearly, and keep evidence linked in a single platform.

▶ Monitoring and Tests

Run automated tests across your environment to monitor success, surface failures and determine remediation plans.

▶ Audit Hub

Centralize auditor collaboration, evidence requests, and approvals in one secure workspace to keep audits on track.

▶ Vulnerability and Asset Management

See asset inventory and vulnerabilities in a single workspace to review exposure and prioritize risks

▶ Agentic TPRM Assessment

Evaluate third-party evidence against defined criteria and produce evidence-backed assessments autonomously.

▶ Trust Measurement

Bridge the gap between security work and business success with insights into impact on revenue, pipeline, and deal velocity.

FOR ANY SAAS ORGANIZATION, BOTH INTERNALLY AND EXTERNALLY, TRUST IS A CRUCIAL ASSET TO CULTIVATE. SHARING THIS NARRATIVE AND THE LESSONS WE'VE LEARNED WITH OUR CUSTOMER BASE IS VITAL FOR UPLIFTING THE INDUSTRY AS A WHOLE.

Ben King, Vice President Security Trust & Culture,
