

ISO 27001 Compliance Automation

Data helps you keep your ISMS current and implement ISO 27001 faster with pre-mapped controls across frameworks, plus automated control monitoring and evidence collection across your existing tools.

DISCOVER THE DRATA DIFFERENCE

► Maintain Audit Readiness Continuously

Data continuously updates ISO 27001 controls, ownership, and evidence so your ISMS reflects current risk, keeping teams ready for surveillance audits and reviews year-round.

► Reuse Evidence Across Surveillance Audits

Data maps ISO 27001 controls to shared, continuously maintained evidence so teams can reuse documentation for surveillance and recertification cycles, keeping records consistent and defensible.

► Connect Enterprise Risk Directly to the ISMS

Data links ISO 27001 risks to controls and evidence, giving clear visibility into treatment. As risks change, alignment stays current. No manual spreadsheet reconciliation needed.

► Scale Third-Party Risk Within the ISMS

Data uses AI to centralize third-party risk signals, assessments, and evidence in your ISMS, showing supplier impact on security objectives and providing audit-ready oversight within a single platform.

ADDITIONAL CAPABILITIES

Standardize Control Structure

Define ISO 27001 controls in a centralized library with clear ownership across teams.

Maintain Evidence Continuity

Preserve historical ISO 27001 evidence for surveillance audits and recertification cycles.

Link Controls to Policies to Risk

Connect controls to policies with tracked reviews, approvals, and version history, and then surface risks automatically upon failure.

Verify Code Changes

Validate infrastructure and application code against ISO 27001 controls using compliance as code tests.

Add Additional Frameworks

Benefit from pre-mapped controls to easily expand compliance with ISO 27017 and ISO 27108.

[DATASCAN]

70%

Faster Audit Readiness

Replaced scattered work across SharePoint, Confluence and Excel with automated evidence and workflows.

[CONNECTIVE]

75%

Reduction in Audit Duration

Cut compliance readiness from weeks to days and instantly cross-map controls to other frameworks
