

TISAX Compliance Automation

TISAX establishes a standardized security assessment and result-sharing model for the automotive industry. Drata helps teams map to VDA ISA controls, centralize evidence, and automate readiness workflows so they can move faster and demonstrate trust to OEMs with less manual work.

DISCOVER THE DRATA DIFFERENCE

► Reduce Duplicate OEM Evidence Requests

Drata reuses controls and evidence to limit duplicate requests across OEM and Tier-1 assessments. Teams reduce supplier audit fatigue while maintaining defensible documentation for automotive security reviews.

► Prepare for Automotive Security Assessments

Drata centralizes evidence and assessor collaboration, helping teams prepare for TISAX reviews with fewer delays. Assessments become more predictable as documentation and ownership stay organized between cycles.

► Govern Multi-Region Supplier Programs

Drata manages frameworks across regions and partners, maintaining consistent governance across complex automotive supply chains. Teams scale supplier programs without creating parallel compliance processes.

► Maintain Defensible Supplier Risk Decisions

Drata evaluates third-party security evidence consistently, supporting defensible supplier risk decisions. Teams maintain trust across automotive ecosystems without manual assessment sprawl or fragmented reviews.

ADDITIONAL CAPABILITIES

Assess Suppliers

View supplier security posture against TISAX requirements using scalable third-party risk workflows.

Structure Scope

Build TISAX assessment scope and requirements with clear ownership across in-scope environments.

Link Risks to Findings

Automatically surface TISAX risks when assessment-related controls fail to support mitigation.

Reuse Evidence

Use TISAX evidence across assessment cycles to reduce duplication and preparation effort.

Support Reviews

Prepare for assessment reviews with structured access, artifacts, and review-ready reporting.

Monitor Performance

Continuously observe TISAX controls to detect failures impacting assessment readiness.
