

SOC 2 Compliance Automation

SOC 2 provides the framework for evaluating how organizations protect customer data through controls related to security, availability, processing integrity, and more. Drata centralizes evidence, automates monitoring, and helps streamline audit readiness to reduce manual work and prove trust.

DISCOVER THE DRATA DIFFERENCE

► Automate Evidence Collection

Drata connects to your tech stack (cloud infrastructure, identity, HR, code, and ticketing) to automatically collect and map SOC 2 evidence. No screenshots, chasing owners, or scrambles.

► Monitor Controls Continuously

Drata continuously tests SOC 2 controls across Security, Availability, Confidentiality, Processing Integrity, and Privacy, alerting you instantly with issues to fix before audits start.

► Partner with Your Auditors

Drata creates a separate, centralized audit workspace for your auditor, complete with mapped evidence, control status, and change logs, providing a better audit experience with reduced audit time, cost, and back-and-forth.

► Reuse Evidence Across Audit Cycles

Drata maps SOC 2 controls to shared evidence and maintains it across reporting periods so teams avoid recreating documentation for each annual audit.

ADDITIONAL CAPABILITIES

Automate Training Tasks

Send reminders and document completion automatically.

Integrate Your Trust Center

Feed documents directly into your Trust Center to provide continuous assurance.

Manage Third-Party Risk

Store, send, and review security questionnaires in one place.

Report on Risk

Use self-assessments to efficiently report on effectiveness.

Streamline Policies

Create, edit, review, publish, and track version history and status in Policy Center.

Utilize Control Library

Take advantage of the control library and/or customize your own controls.

Integrate with Trusted Partners

Unlock the power of automation with hundreds of integrations across your tech stack.

[LEMONADE]

80%

Faster Audit Prep

Continuous compliance automation sped up audits with streamlined evidence collection, fewer auditor calls, and more time for higher-impact work.

[BREX]

3x

Productivity Increase

Drata expanded automated monitoring controls, enabling faster and more predictable remediation sequencing.
